and Lay

Rivergum Homes is a South Australian success story, a progressive building company renowned for innovative design, exceptional quality, affordability and a commitment to excellence. Creating better lives for their customers for over 25 years.

Best's Landscape and Services team is proud to be collaborating with Rivergum to provide a complete landscaping package on the beautiful Kensington 43 home design, part of its signature range.

The Kensington 43 is currently on display at Miravale, Angle Vale, with a magnificently finished outdoor space that complements the display home, and really makes it shine!

Customers who choose the Kensington 43 can select a complete landscaping and paving package from Best to ensure that their home, when built, will have all outdoor areas finished to the highest standard, including the driveway, all pathways, alfresco area and landscaping to both front and rear of the property.

The display home features Best's Honed Best Paver and Best Flag pavers in charcoal with a bevel edge for all pathways and the driveway, giving the entire property a consistent look and feel. The driveway is paved in a classic herringbone pattern with a running border, making it a stunning feature of the home, while all paths are laid in a square brickwork pattern, offsetting them beautifully against the driveway and the home itself.

When customers build a new home, they often live with a muddy, unfinished outdoor area for months after they have moved in. This collaboration between Rivergum and Best solves that problem! Best's Total Outdoor Hard and Soft-scaping service provides a one-stop shop, removing what can be a time consuming and challenging process.

At Best we don't just supply and lay quality pavers, we now offer a complete outdoor landscaping service - providing creative, beautifully designed outdoor areas and gardens. To put it simply, at Best, we make your vision come to life!
